Feedback comments

Group work grade = 71%

Individual grade = 92.5% - your contribution to this work is excellent

Overall grade = 75%

Criteria and weighting	Level	Comments
Knowledge and Understanding, (25%)	Excellent	There is excellent demonstration of knowledge and understanding in the rationale for the proposed solution. Sound justification of the approach and methods to be employed. Proposal may benefit from providing some background literature of related work to support as this was lacking.
Application of Knowledge(25%)	Very good	There is evidence of application of knowledge. Sound knowledge of agent-computing have been demonstrated. Good use of the UML diagrams to express . However, the concepts of perception, reasoning and action could be better mapped to the components.
Criticality (25%)	Excellent	There is demonstration of criticality in the justification of the choices and the discussion around potential challenges and possible solutions to those challenges.
Structure and Presentation (as detailed in the assessment guidance) (25%)	Excellent	Excellent presentation overall, with good structure and references to the write-up. Very good presentation.
